What is For Schools

For Schools is an interactive, play-based learning environment for teachers to deliver the Australian Curriculum.

This 'press play' teaching tool is set to transform education delivery, empowering teachers to deliver extraordinary experiences for our most important citizens, the children of Queensland.

Filmed throughout regional Queensland, these visually stunning videos and learning tools will take the children on an outback adventure.

The Program provides the achievement standards for Visual Arts for each year level.

About Flying Arts

Flying Arts has been teaching and supporting Queensland communities for 55 years. Flying Arts' founder, Mervyn Moriarty OAM, is a legendary figure in the Queensland arts community. In 1970, Merv used prize money from an art award to learn to fly so he could teach art in outback communities where there was no access to the arts.

This legacy lives on today in the work of Flying Arts, it is this pioneering spirit for education that we draw on to develop the For Schools program.

Included:

- Artist-led interactive and engaging lessons
- Three-year levels in Primary School (Juncture Year levels 2, 4 & 6) in accordance with the Australian National Curriculum Version 9
- Developed by teachers for teachers
- Professional Development
- Lesson Plans
- Interactive, engaging & inspiring materials
- Support forums
- Visually beautiful assets
- Annual Subscription \$1,000 per school (bursaries and discounts available for small schools)

"Merv believed that art offers us a means of re-thinking the impossible into being. Of journeying into unknown spaces and places and ideas and images. Of re-imagining new ways of acknowledging and apprehending who we are, and who we might become."

- Professor Pat Hoffie AM
